

CDPM Paging Microphones

CDPM 12

CDPM 4

CDPM 16

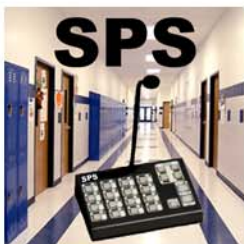

CDPM 8

The CDPM range of microphones can be used for paging with several SPS products and can be integrated with the SPS CPM microphones or 3rd party systems that require 'short to ground' for paging access. With four models in the range, CDPM 4, 8, 12 & 16 and the ability to link 32 CDPM's together, designers have the flexibility for large complex, multi-zone paging systems.

CDPM with analog interface installed. (One mic in the system needs an analog interface)

- CDPM 4, 8, 12 & 16 zone paging microphones
- Simple CAT5, mic to mic cabling
- Flexible power supply options
- 'Paging Group' key assignment
- Selected zone, group or "Call all" paging
- First come first served priority
- "Busy" indicator to show system in use
- Any mic can be configured with ultimate priority
- High quality cardioid capsule
- Integral compressor
- A choice of three chimes
- Internal sounder
- Factory 're-set' (by jumper)
